HIGH-PERFORMANCE GLASS SYSTEMS

Gorell offers several unique high-performance Low-E glass systems that are designed to provide precisely the level of comfort, thermal performance, security, sound deadening and UV protection you deserve.

DECORATIVE GLASS

3000G Series windows with beautiful stained and leaded glass designs allow sunlight to spill uniquely fascinating patterns of colors and textures into your home. Gorell also offers glass with exquisite V-grooved patterns, etched glass designs, and obscure glass patterns which provide privacy while still allowing light into your home.

BETTER-VUE® SCREENS

Heavy-duty aluminum screen frames feature BetterVue screen cloth— specially selected to give you 10% better insect protection, 20% more airflow, and a clearer view of the outdoors.

SOLARSHINE™

This coating almost seems to make exterior glass clean itself. It uses a remarkable process that enables the sun's rays to actually loosen and break down dirt, which is then easily washed away by the rain.

INTERBLINDS™

Amazing "between-the-glass" tilt-only blinds provide instant privacy, shade, comfort and beauty. They are easy to operate and never require cleaning.

INTERNAL GRIDS

Finely detailed internal grids give windows the look of traditional divided lites, yet allow for easy window cleaning because they're encapsulated between the glass panes. Grids available in flat or contour.

Give Your Home a Stylish, One-of-a-kind Appearance.

Gorell offers you almost limitless possibilities for creating a beautiful and truly unique look for your home. Express your individual taste by adding a touch of elegance to your windows—or introducing spectacular colors and artistic designs into rooms. Choose from a range of color options, grid styles, decorative glass patterns and other options.

INTERIOR/EXTERIOR VINYL COLORS

Beige*

Brown**

*Beige is not available in Garden Windows.
** Brown is AAMA SILVER Label Rated

Energy Efficient Performance.

AAMA GOLD LABEL CERTIFIED PERFORMANCE

Air: 0.05cfm at 25mph*
Water: DP50 at 54mph at 8" rain per hour**
Structural: DP40 at 153mph windload***

NFRC THERMAL PERFORMANCE

AC MASTER GLASS
U-Factor: 0.28
SHGC: 0.26

*6 times better than industry minimum .30cfm **8" rain per hour (64% over industry minimum 33mph)
***63% stronger than industry minimum 94mph Test results vary by style and size of window. Size tested is 44" x 63" with SSB glass.

3000G Series

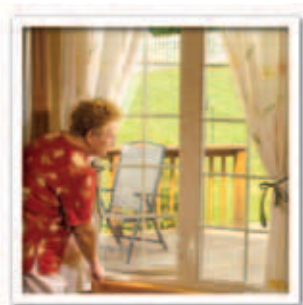

Casement, Awning & Hopper Windows

Elegantly styled windows that lower home energy costs and provide security, exceptional comfort, and directed ventilation.

GorellTM
WINDOWS & DOORS

Gorell 3000G Series Windows Provide Greater Comfort and Energy Cost Savings.

SEE AND FEEL THE DIFFERENCE!

If you appreciate clean lines, a wide-open view and springtime breezes—as well as free time—you'll really like Gorell casement and awning windows.

These products are some of the most energy-efficient operating windows available in America. You'll see lower home energy consumption and experience a new dimension of comfort in your home. Say goodbye

to uncomfortable drafts and enjoy constant temperatures in your home year round.

KEEP INTRUDERS OUT.

Gorell projecting windows close tightly and securely, giving your home a high level of protection. Their exceptionally strong construction and superior multi-point locking hardware make the Gorell 3000G series window a very popular choice.

EXPERIENCE DECADES OF SMOOTH, RELIABLE OPERATION.

Gorell casements open on the side and swing out for full, top-to-bottom ventilation. Awning windows open out from the bottom, so with the turn of a handle, you can pull in a summer breeze while allowing your windows to remain open during a light rain. Hoppers open in from the top and are typically used in basements.

Soft-Lite, window partner with the National Crime Prevention Council, offers intruder-resistant windows.

7-Time winner—National ENERGY STAR® Partner of the Year.

OUR LIFETIME WARRANTY protects your investment and our reputation. It guarantees that all moving parts and the hermetically insulated seal in our windows are free from defects in materials or workmanship. It also guarantees that our vinyl colors will remain true for the life of your home. Non-prorated. Transferable. Glass-breakage warranty available.

Standard Features of 3000G Series Windows

1. Robotically sealed corners ensure the window stays square and will never require sealants.
2. Expertly engineered, durable vinyl frame with multiple structural hollows provides extraordinary strength and insulating properties.
3. Automotive-type glazing adheres the glass to the sash and creates a seal so tight that nothing can get through.*
4. Soft-Stik™ foam inside the frame chambers drastically improves thermal efficiency.*
5. Heavy-duty aluminum screen frames feature BetterVue™ screens that give you a clearer view of the outdoors, and the added airflow you'll get for ventilation is almost like having no screen at all.*
6. Stylish exterior frame is especially attractive to give your home absolutely beautiful curb appeal.*
7. Premium-grade weather seals create a virtually airtight seal.
8. Multi-point locking hardware ensures exceptionally easy, problem-free operation—even for larger vent sizes.
9. Due to the unique hinge design the exterior of our casement is easy to clean from inside the comfort of your home.

3000G Series casement shown in Soft-White™.

Robust strength in a low-profile, fold-down handle design. Easy to open and close handle and hardware last a lifetime.

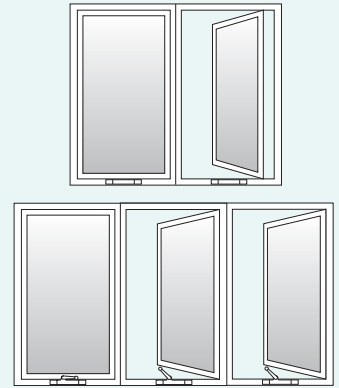

3000G Casement windows open a full 90° for easy cleaning of both the inside and outside. (Egress hardware is optional)

CONFIGURATIONS

Casements are available in 2- or 3- lite models.

AWNING WINDOWS

Gorell awning windows come with a custom-engineered lock-and-seal system featuring two lever locks that pull the sash in securely for a tight, full-perimeter seal.

HOPPER WINDOWS

Hopper windows are often used in basement rooms. However, they are a nice addition above picture or double hung windows.

Hidden corrosion-resistant steel locking claws smoothly engage in self-lubricating keepers, ensuring a secure weather-tight seal.

Multi-point lock activator engages or disengages multiple sash locks with one easy single lever design.

* Features not visible in photograph because of their location inside window frame.
