

## 5050G Series Gorell Single-Hung

When it comes to value, Gorell's 5050G Series windows are in a class of their own. These new windows combine quality and styling with impressive features found on

Gorell's award-winning premium-level products. They are easy to operate, require practically no maintenance, help you manage heating and cooling costs and will increase your home's value.

### MADE TO GORELL QUALITY STANDARDS

5050G Series windows are made with the same special-formula vinyl used in other Gorell products.

They feature many of the same qualities. These include the PPG Intercept® spacer system, a popular high-performance glass system, Gorell's heavy-duty lock that tightly secures the sashes, and an attractive grooved fusion weld that increases thermal performance and longevity.

- Interlock at meeting rail minimizes air infiltration.
- Curved exterior provides a pleasing appearance.
- Multi-chambered frames with heavy gauge vinyl walls provide superior strength and thermal performance.
- One-Piece Mortised Sloped Sill creates strong bond between sill and jamb for maximum weather protection.
- Highest quality PVC vinyl stands up to the weather, wherever you live, for a lifetime.
- Double weather stripping surrounds sash perimeter to provide maximum weather protection.
- Constant force balance uses a coil that provides smooth, easy operation. Never needs lubrication or adjustment.
- Soft-Seal™ straddle gasket system at sill creates barriers and diversions against air and water infiltration.
- Snap-on, flexible nailing flange and J-Channel for new construction is available with unique welded corners.

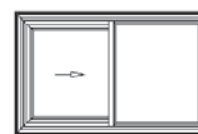

This special window series is available in several models and configurations, including single-hungs (one operating sash), two- and three-lite sliders and picture windows.
