

5400G Series
High-Performance Windows

Remarkably strong windows for long-lasting durability, energy efficiency and beauty.

Gorell 5400G Series Windows— superb protection and energy efficiency.

Rugged, heavy-duty 5400G Series windows are specifically designed to help protect your home against intrusion and make your home as “green” and energy-efficient as possible. They are rigorously tested and rated to stringent window industry DP-50* standards. These super-tough windows are ideal for locations—such as coastal areas—that require windows that keep out wind and water but don’t

need to include costly “impact” glass.

5400G Series windows help maintain constant temperatures throughout your home to keep you more comfortable and healthy—and lower your energy bills. Gorell offers you numerous ENERGY STAR® qualified high-performance glass options with its windows, so that you can select the perfect level of thermal efficiency for your home.

These highly advanced windows also provide you with benefits like greater safety and security, easy operation and extremely low maintenance.

* Design Pressure, or DP, ratings are site specific, depending on the region in which you live. Wind velocity—which is simulated with both positive (exterior wind pushing against the home) and negative (exterior wind pulling away from the home) pressure—factors into the DP rating that a product receives, as do air infiltration and water test pressure levels.

OUR LIFETIME WARRANTY protects your investment and our reputation. It guarantees that all moving parts and the hermetically insulated seal in our windows are free from defects in materials or workmanship. It also guarantees that our vinyl colors will remain true for the life of your home. Non-prorated. Transferable. Glass-breakage warranty available.

5400G Series Features

1. Rigid, high-performance window frames—with all corners robotically fused together at high temperatures for extraordinary strength—feature 13 separate chambers to improve insulating properties, as well as strength and rigidity.
2. Comfort-Foam™ inside the frame chambers enhances thermal performance.*
3. Heavy-duty constant force balance system—with stainless steel reinforced attachment points—gives you fingertip operation on even the largest of double-hung models.*
4. Double heavy-duty cam sweep locks hold sashes in place and give your windows vise-like strength and security. From the outside looking in, they cannot be seen, which gives your windows a more attractive appearance.
5. Soft-White™ or Beige vinyl complements practically any architectural style and is pleasing to the eye.
6. Zamac 3 zinc-aluminum tilt latches on double-hung models also help keep sashes secure, yet let you tilt in sashes easily to make cleaning a breeze.
7. Automotive-type glazing seals the glass to the sash frame, creating a super-tight seal.*
8. Insulating foam wrap around the frame significantly reduces the possibility of drafts around the window frames.

* Features not visible in photograph

5405G Double-Hung Model

9. Elegant dual millwork lines on the interior master frame provide the look of handcrafted molding.

10. Special double weather stripping seals out drafts and dust and improves insulation and window performance.

11. PPG Intercept® warm-edge spacer system is time-proven for long-term seal dependability and exceptional thermal performance. Optional upgrade to Super Spacer® metal-free spacer system is available.

12. Heavy-duty aluminum screen frames feature BetterVue® screen cloth—specially selected to give you 10% better insect protection, 20% more airflow and a clearer view of the outdoors.

WINDOW STYLES AND CONFIGURATIONS

Along with the 5405G double-hung, the 5400G Series is available in several styles, including the 5402G horizontally sliding lift-out windows and 5401G picture window models.

HIGH-PERFORMANCE GLASS SYSTEMS

Gorell offers numerous proprietary, high-performance Low-E glass systems that are designed to provide precisely the level of comfort, thermal performance, security, sound deadening and UV protection you desire. All 5400G Series windows that incorporate one of these high-performance glass systems qualify for the ENERGY STAR® label.

DECORATIVE GLASS

5400G Series windows with beautiful stained and leaded glass designs allow sunlight to spill fascinating patterns of colors and textures into your home. Gorell also offers glass with exquisite V-grooved patterns and etched glass designs.

Camelot Decorative Glass

Natchez Stained Glass

SOLARSHINE™

This coating almost makes exterior glass clean itself. A remarkable coating is fused to the exterior of the glass, enabling the sun's rays to actually loosen and break down dirt. The ultra slick coating then, amazingly, washes away dirt and debris when it rains—and dries spot free.

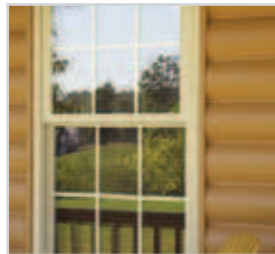

INTERBLINDS™

Amazing “between-the-glass” blinds provide privacy, shade, comfort and beauty. They are sealed inside the glass panes so they never require cleaning.

INTERNAL GRIDS

Finely detailed and contoured internal grids give windows the look of traditional divided lites, yet allow for easy window cleaning because they're encapsulated between the glass panes.

Give Your Home a Unique, Personalized Look.

Gorell offers a myriad of options to allow you to truly custom design windows that meet your unique needs and personal preferences. Choose from various color combinations, decorative glass patterns and much more. A palette of beautiful colors allows you to coordinate or contrast your windows to your home—giving your home an all-new ambiance, inside and out. Choose from Soft-White™ or Beige vinyl—and from an unlimited array of exterior color options.

INTERIOR/EXTERIOR VINYL COLORS

SURE-COAT™ EXTERIOR PVC BOND COLORS

Coastal Dune 08	Champagne 10	Sandstone 37	Wedgewood Blue 93	Terratone 53	Forest Green 78	Bronze 21
Almond 20	Colonial Ivory 32	Gray 39	Sierra 83	Rosewood 57	Royal Brown 24	Black 09
